The search for a Quark-Gluon Plasma

NA50 experiment

Study of production of charmed bound states in Pb-Pb collisions at 158 GeV/nucleon

---

Who ? (the NA50 collaboration)

Why ?

When ?

How ?

- *The signatures*
- *The spectrometer*
- *The experimental data*
- *The analysis*

What ?

- *The results*
- *Their discussion*

What to conclude ?
