Some closing remarks

Norman McCubbin

Some closing remarks

- As always, an interesting (and exhausting) week….
- Release of 'May-prototype' and associated tutorial is an important success. **Very well done all involved!** Note that:
  - it is a 'pre-alpha' release, and experience and feed-back are essential to inform the..
  - …**review process** (July 10), which will:
    - review 'May-prototype'
    - assess strategic direction

Some closing remarks

- Also very encouraging progress in what we use framework for:
  - Simulation (ATLFast, G4,..) Reminder: May 18
  - Reconstruction
  - Graphics
- Particular concern is shortage of effort in development and support of infrastructure: 'core', srt, training, doc/QC,… So, if you know of candidates...

Some closing remarks

- The PLAN: delivery of first version is 'in sight'. The planning process has already been useful; but full benefit comes from keeping plan up-to-date etc.
- World-wide computing/GRID: do we understand implications, needs,..?? (I don't.) Just better ftp and remote submission? Or 'paradigm-shifting', life-changing ..?? Work-shop (Indiana) mid-June.

Some closing remarks

- **Thank-you**:
  - LBNL local team: excellent organisation, venue, weather, view,.....
  - Helge: deserved 'relief' after organising 13(?) work-shops;
  - to all of you for coming.
- Safe journey home...
