LCB Workshop Preparation

ATLAS Software Workshop

May 1999

Jürgen Knobloch

Slides on: http://nicewww.cern.ch/atlas/wwwslides/lcbws990518/index.htm

Details

- Dates: September 28 - October 1, 1999
  - First day: Event Filter Workshop
- Place: Marseille (France)
- First announcement sent April 21
- Web site: http://marcpl2.in2p3.fr/LCB/
- Participants: Mainly people from LHC experiments, some from IT, BaBar, Fermilab. No quota for members of LHC collaborations.

Themes

- ## Architecture
  - components : the practical approach and status of the different experiments
  - critical design issues such as treatment of data persistency
- ## Technology tracking
  - networking
  - processors, memory, storage

- ## World wide computing
  - the MONARC project
  - collaborative tools
  - data management
- ## Simulation
- ## Analysis tools
  - physics analysis tools (commercial and HEP specific)
  - the available practical experience

Format

- Each session introduced by a "rapporteur"
- Large fraction of time devoted to discussions
- Contributions from the community by early July
  - No papers - but rather abstracts and web links to get the rapporteurs interested

Next

- Propose rapporteurs and convenors
- Establish guidelines concerning the issues to be treated in each session
- Propose and prepare ATLAS contributions
