Review Status

Steve Fisher / RAL

Review Status

- The DIG as one of its final actions decided that the ongoing reviews should be completed.
- There were 3:
  - SRT documentation and design
    - Waiting for new deliverable
  - Muon Code
    - Waiting for one reviewer
  - Graphics Code
    - Waiting for one reviewer

DG issues

- In the earlier reviews all issues were resolved
- More recently the DG category
  - Important requirements and manpower issues
  - Some came up in the SRT review:
    - *srt configure* instead of *autoconf*
    - should the SRT manual give advice on sensible use of CVS
      - e.g. committing bad code
    - missing chapter where the producer feels unable to commit to a time for providing it.
  - QC group should consider how to handle them
