

ATLAS World-Wide Computing Group Meeting 9/2/1999

- The meeting was devoted to initiation of future simulation and modeling work towards evaluation of possible computing models for ATLAS analyses.
- Significant progress has been made within MONARC towards development and validation of flexible and powerful simulation tool with which experiments could now begin to evaluate

ATLAS World-Wide Computing Group Meeting 9/2/1999

- We had three presentations:
 - Iosif Legrand : MONARC SIMULATION TOOL - STATUS AND FUTURE PLANS
 - Youhei Morita: VALIDATION
 - Laura Perini: MONARC PLANS FOR MARSEILLE MEETING AND BEYOND

ATLAS World-Wide Computing Group Meeting 9/2/1999

- ANYONE INTERESTED IN WORKING ON SIMULATION AND MODELLING OF ATLAS COMPUTING MODELS SHOULD CONTACT krzysztof.sliwa@cern.ch
