Dr. Rajeeb Hazra will be giving a computing seminar on Exascale Computing at CERN on Friday 4 December

In the context of the CERN openlab collaboration, a group of Intel staff will be coming to CERN on Friday 4 December to discuss common projects with the team.

On this occasion, Dr. Rajeeb Hazra, Director of Supercomputing Architecture and Planning at Intel Corporation, has also offered to share more widely his views and present Intel's current strategies on Exascale Computing.

The lecture 'The Challenges of Exascale Computing' will start at 2PM in the IT Auditorium.

Further details about the event are available on:
